

General: What computer platforms/operating systems are supported?

APS/IT supports the following Operating System/hardware platforms:

- Intel-based Computers running Windows NT, Windows 2000, and Windows XP.
- Intel-based computers running RedHat Linux 9.0 and greater
- Apple Macintosh computers running MacOS 9 and MacOS X.
- Sun computers running Solaris.

Older Intel-based computers with clock speeds less than 300 Mhz are not supported. Windows 9X and ME systems are not supported and must be removed from the APS network. Older Sun workstations such as SPARCstation models are also no longer supported.
